**TEACHER RETIREMENT SYSTEM OF TEXAS MEETING
BOARD OF TRUSTEES
AND
INVESTMENT MANAGEMENT COMMITTEE**

April 30, 2026 – 10:00 a.m.

*All or part of the April 30, 2026, meeting of the TRS Investment Management Committee and Board of Trustees may be held by telephone or video conference call as authorized under Sections 551.130 and 551.127 of the Texas Government Code. The Board intends to have a quorum and the presiding officer of the meeting physically present at the following location, which will be open to the public during the open portions of the meeting: **4655 Mueller Blvd, 2nd Floor, Boardroom.***

The open portions of the April 30, 2026, meeting are being broadcast over the Internet. Access to the Internet broadcast and agenda materials of the meeting is provided at www.trs.texas.gov. A recording of the meeting will be available at www.trs.texas.gov.

AGENDA

1. Call roll of Committee members.
2. Consider the approval of the proposed minutes of the December 2025 committee meeting – Committee Chair.
3. CIO Update including Talent Management; Accomplishments; Notices; Awards; Key Dates and Upcoming Events – Jase Auby.
4. Discuss the Fourth Quarter 2025 Performance Review – Colin Bebee and Mika Malone, Meketa.
5. Semi-Annual Risk Report – James Nield and Stephen Kim.
6. Annual Review of Public Markets – Dale West, Brad Gilbert and Ashley Baum.

NOTE: The Board of Trustees (Board) of the Teacher Retirement System of Texas will not consider or act upon any item before the Investment Management Committee (Committee) at this meeting of the Committee. This meeting is not a regular meeting of the Board. However, because the full Committee constitutes a quorum of the Board, the meeting of the Committee is also being posted as a meeting of the Board out of an abundance of caution.

Minutes of the Investment Management Committee

December 4, 2025

The Investment Management Committee of the Board of Trustees of the Teacher Retirement System of Texas met on Thursday, December 4, 2025, in the boardroom located on the Second Floor of TRS' offices located at 4655 Mueller Blvd., Austin, Texas 78723.

Committee Members:

David Corpus, Chair
Michael Ball
John Elliott
Robert H. Walls, Jr.
Elvis Williams

Other TRS Board Members Present:

Brittney Allred
Laronda Graf
John R. Rutherford

Others Present:

Brian Guthrie, TRS	Keith Brown, Investment Advisor
Caasi Lamb, TRS	Colin Bebee, Meketa
Heather Traeger, TRS	Mika Malone, Meketa
Jase Auby, TRS	Suzanne Dugan, Cohen Millstein
Don Green, TRS	Kathy MacVarish, State Street
Kendal Courtney, TRS	Dan Delaney, State Street
James Nield, TRS	
Mr. Telschow, TRS	
Katherine Farrell, TRS	

Investment Management Committee Chair, Mr. Corpus, called the meeting to order at 12:35 p.m.

1. Call roll of Committee members.

Ms. Farrell called the roll. A quorum was present.

2. Consider the approval of the proposed minutes of the September 2025 committee meeting.

On a motion by Mr. Williams, seconded by Mr. Ball, the Committee unanimously voted to approve the proposed minutes of the September 2025 Investment Management Committee meeting as presented.

3. CIO Update including Talent Management; Accomplishments; Notices; Awards; Key Dates and Upcoming Events – Jase Auby.

Mr. Auby provided the CIO update and reported strong investment performance through the third quarter of 2025, including a one-year return of 10.7 percent and a three-year return of 11.5 percent, with record three-year excess return versus the benchmark.

Mr. Auby discussed the SPN Summit held in New York City, noting that artificial intelligence was a major focus and that AI continues to be an internal priority. He also described annual planning activities underway for 2026, including capital planning and annual priorities, and he noted the 10th anniversary of TRICOT.

Mr. Auby concluded by sharing he had accepted an invitation to join the Financial Sector Advisory Council of the Federal Reserve Bank of Dallas.

4. Discuss the Third Quarter 2025 Performance Review - Colin Bebee and Mika Malone, Meketa.

Mr. Colin Bebee started noting this was Meketa's first performance presentation to the Committee and noted that Meketa worked to replicate the format previously provided, while identifying potential enhancements to consider in the future.

Mr. Bebee provided market context for the period noting global equity was strong across the board and it was the first time since the global financial crisis (GFC) that non-US markets outperformed the US markets. He noted real estate continued to struggle.

Ms. Mika Malone reviewed portfolio-level information, including discussion of cash flows. She stated the portfolio sits in line with the policy targets. She noted the majority of the outperformance was in the security selection. In response to Mr. Walls' inquiry about the appropriateness of the peer group comparison, being at \$10 billion when TRS is \$230 billion, Ms. Malone responded that Meketa would continue to evaluate options, noting the tradeoff between increasing minimum fund size and losing peers, and suggested comparing multiple peer-set options in a future meeting.

She concluded by reviewing the 14 subcategories across the portfolio, ten of which had performance above 10 percent, which was extraordinarily positive.

5. Update on Investment Operations – Kendall Courtney.

Ms. Kendall Courtney provided the Investment Operations update and described the mission, operating model, and team structure supporting investment execution, data, and operational processes. She reported operational results and described settlement activity which included successfully settling \$1.6 trillion in trades, averaging \$5 billion per day across 56 markets, achieving a 99 percent on-time settlement rate. She discussed "non-investment alpha" and the value of operational savings that provided an additional \$541 million to the trust.

Ms. Courtney provided an update on the State Street custodian contract extension, stating that the extension was approved in September after evidence of progress and continued focus. She also provided an update on the Investment Data Modernization program (IDM), including schedule status, budget status, vendor selection, and implementation kickoff.

6. Annual Update on Risk and Portfolio Management – James Nield and Mark Telschow.

Mr. James Nield described the group’s four mandates and stated that the presentation would focus on multi-asset strategies, trust management, and trust strategy.

Mr. Telschow summarized the performance of portfolios managed by the group and shared that government bonds contributed \$33 million to alpha; risk parity contributed \$126 million to alpha, and alternative risk premia (ARP) contributed \$109 million to alpha. He noted ARP was new to the group but not new to the Trust.

Mr. Nield reviewed trust management, including examples of trust financing, cash management, and rebalancing. He discussed trust strategy considerations including capital market assumptions, peer activity observations, and macro considerations. He stated that the asset allocation approved almost a year earlier continues to make sense based on the considerations reviewed.

There being no more business before the Investment Management Committee, the committee adjourned at 1:40 p.m.

Approved by the Investment Management Committee of the Board of Trustees of the Teacher Retirement System of Texas on April __, 2026.

Katherine H. Farrell
Secretary to the Board of Trustees
Teacher Retirement System of Texas

CIO Update

Jase Auby,
Chief Investment Officer

April 2026

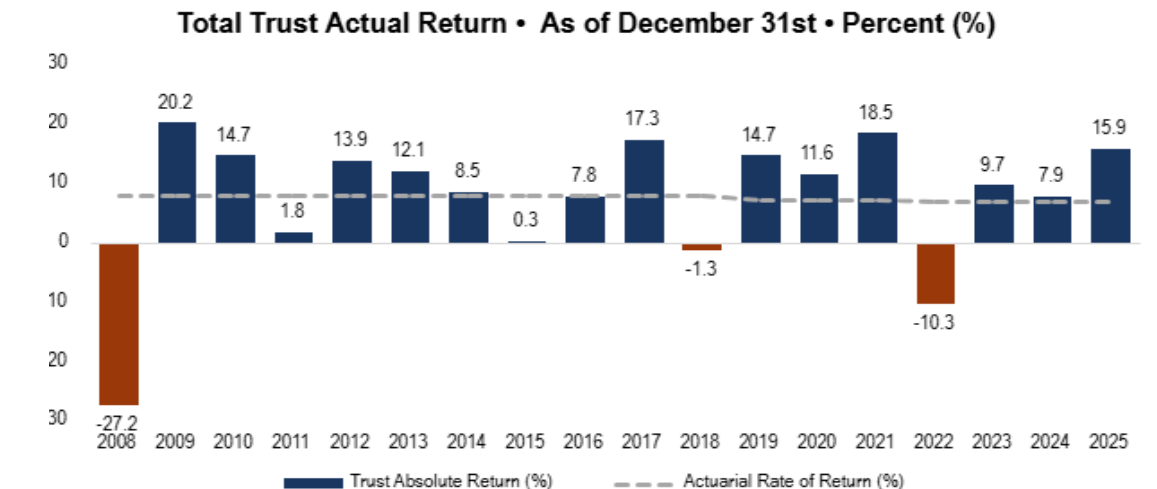

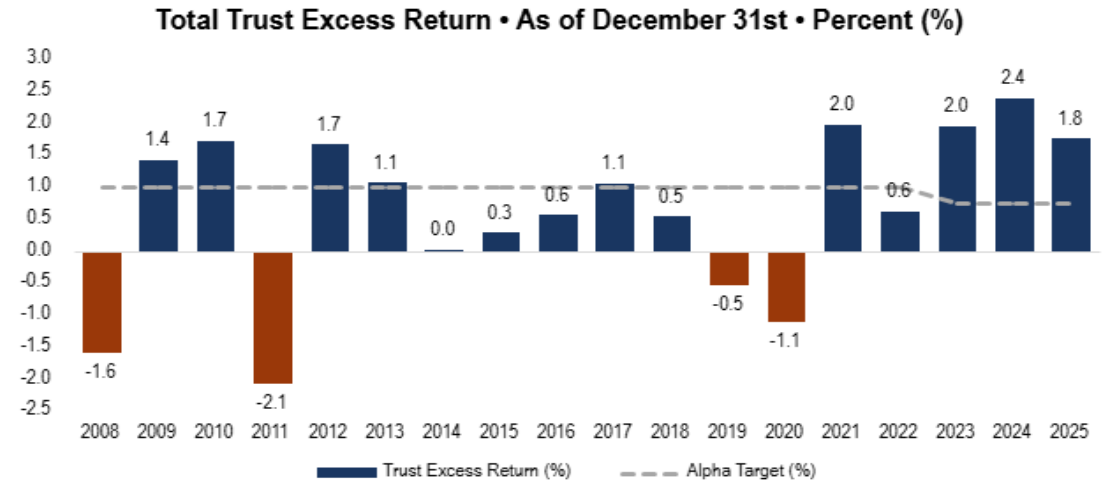

CIO Update

IMD at a Glance

Priorities

- **Performance.** The Trust ended 2025 with a 1-year return of 15.9% and +176 bp of excess return. The 3-year return is 11.1% with +208 bp of excess return
- **Artificial Intelligence.** A cross-functional working group is exploring the effects and implications of artificial intelligence on investments at TRS
- **Performance Reviews.** Annual director discussions will be used to improve transparency and visibility in performance and career growth, supporting development and succession planning for senior roles
- **Awards.** The IMD Real Estate team won the PERE Award for Institutional Investor of the Year in North America

2025 In Review

Teacher Retirement System of Texas

As of December 31, 2025

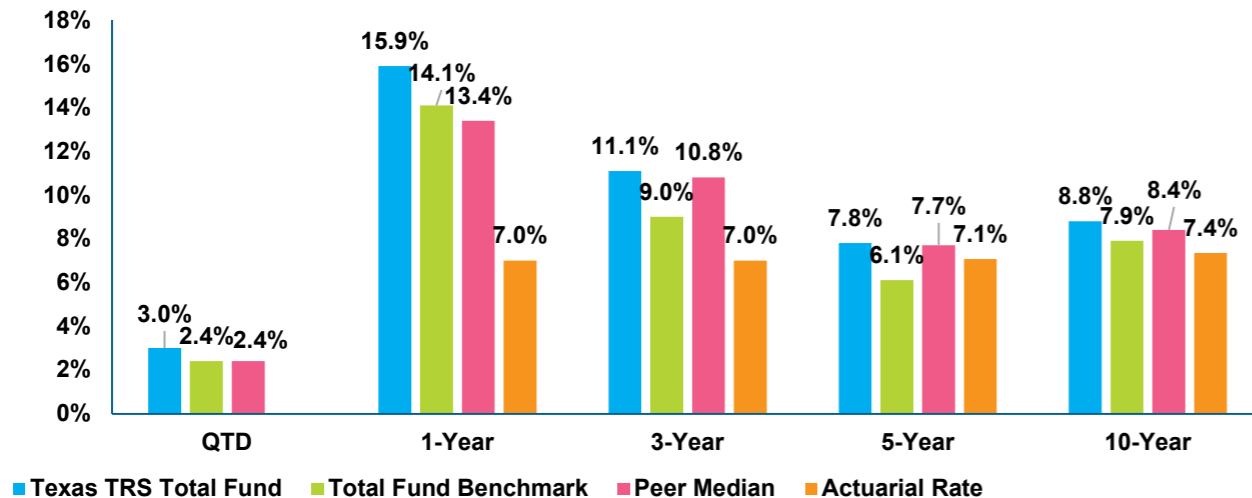

Performance Review
Fourth Quarter of 2025

Executive Summary

Executive Summary

- As of December 31, 2025, the Texas TRS Trust was valued at \$235.2 billion, reflecting a \$5.8 billion increase from the end of the third quarter. In the fourth quarter of 2025, the portfolio returned 3.0%, outpacing the Policy Benchmark and peer median¹ returns of 2.4% each. Benchmark relative outperformance was driven by moderate contributions across multiple asset classes, with security selection driving the majority of the outperformance.
- Over the trailing 3-year period, the Texas TRS Trust returned 11.1%, outpacing the Policy Benchmark and the peer median, which returned 9.0% and 10.8%, respectively. The strong performance, both absolute and relative to the Policy Benchmark, was attributable to multiple asset classes, as the majority of the Trust's components/classes outperformed their respective benchmarks.
- The portfolio's risk, as indicated by standard deviation, was 7.5% for the trailing 5-year period, below the Policy Benchmark at 7.7% but above the peer group median of 6.4%. The portfolio's risk-adjusted return, as indicated by the Sharpe Ratio, over the past 5-year period was 0.6, which was above the Policy Benchmark ratio of 0.4 but marginally below peer group median ratio of 0.7.

Return Summary

Summary of Cash Flows

	QTD	1-Year
Beginning Market Value	\$229,352,149,013	\$207,301,783,683
Net Cash Flow	-\$1,148,573,918	-\$4,671,362,833
Net Investment Change	\$6,962,638,557	\$32,535,792,802
Ending Market Value	\$235,166,213,652	\$235,166,213,652

**Performance Update
As of December 31, 2025**

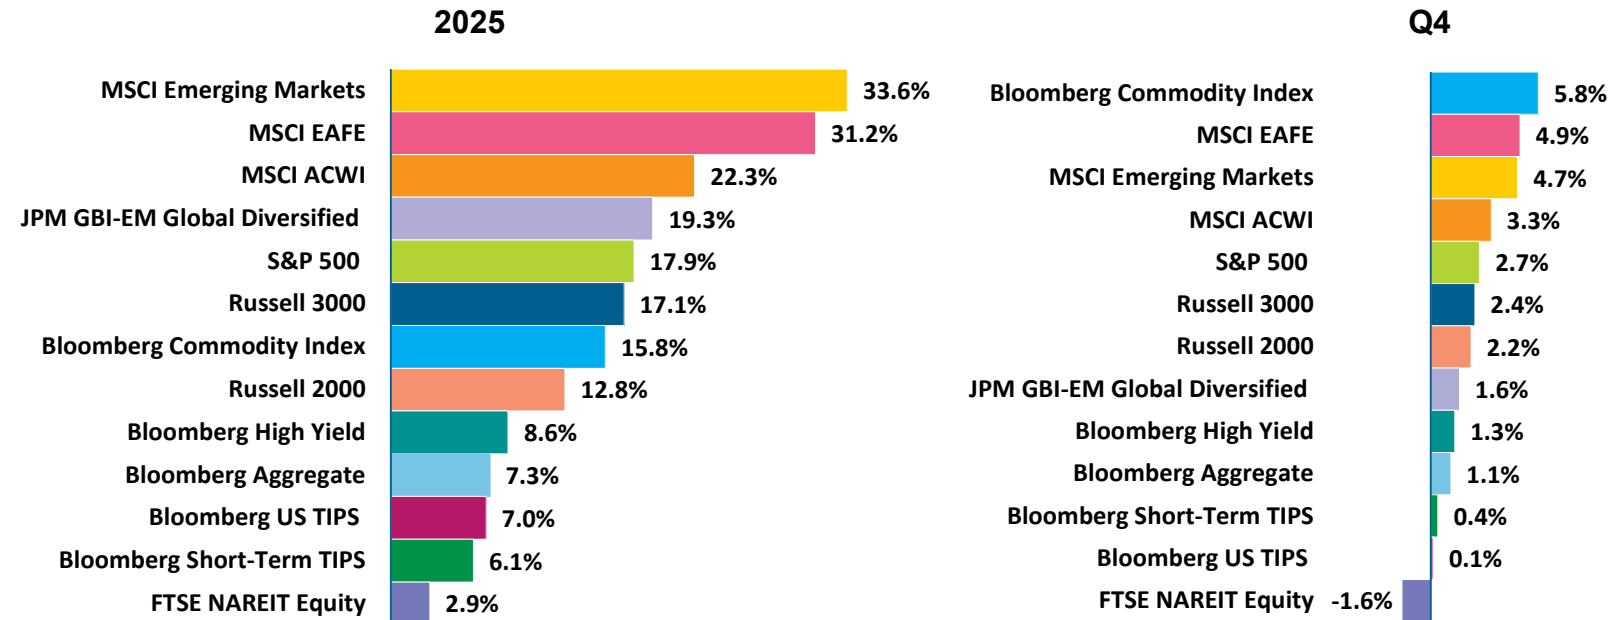

- In Q4 2025, the S&P 500 Index continued to climb due to a rally in the healthcare sector, despite growing valuation concerns regarding AI-related sectors. Non-U.S. equities continued to outpace U.S. equities, due to attractive valuations, a weaker US dollar and rotation out of US tech stocks. Global Equity Policy Benchmark returned 3.4% for Q4.
- Bonds returns were positive as declining short-term interest rates and relatively stable credit spreads yields served as tailwinds. The Stable Value Policy Benchmark posted a 0.4% return for the quarter.
- The Real Return Policy Benchmark posted a 1.0% return for the quarter, while the Risk Parity Policy Benchmark returned 4.1%.

Note: The returns shown in this presentation may differ from State Street statements due entirely to rounding. These differences are generally within a few basis points and are not material.

Index Returns¹

- In the fourth quarter, except for REITs, markets delivered positive returns. Non-US developed and emerging market stocks outperformed US stocks while bond markets benefited from stable inflation and lower interest rates. Commodities were the top performer given the significant run in precious and industrial metals.
- In 2025, all asset classes rose, with international equities leading the way. Key drivers of the strong performance last year include resilient earnings, AI optimism, a weaker US dollar, and expectations for lower interest rates.

Annual Review of Public Markets

Dale West, Senior Managing Director, Public Markets
Brad Gilbert, Managing Director, External Public Markets

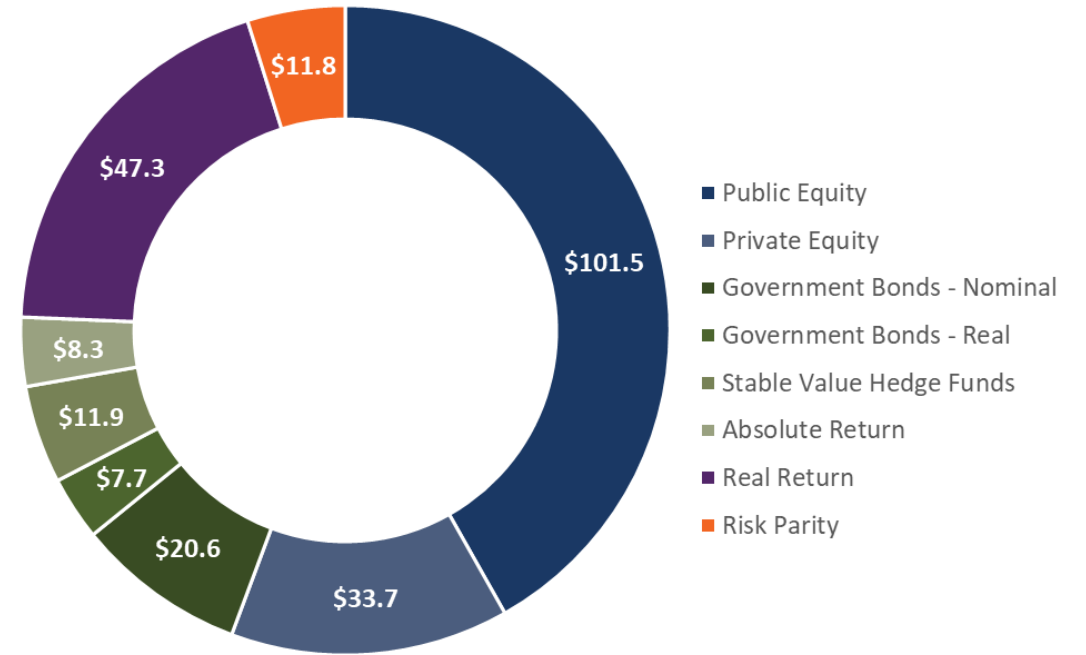

April 2026

Agenda

- I. Public Equity
- II. Stable Value Hedge Fund
- III. Absolute Return

**TOTAL TRUST as of
December 31, 2025**

Trust Investment Exposure	\$242.8
Asset Allocation Leverage	(\$7.6)
Total Trust	\$235.2 billion

Public Markets Overview

External Public Markets (EPU)

No. of People: 12

AUM: \$71.6B

Mission: Identify and invest with external managers to access strategies which complement internal TRS capabilities. Mandates include equity funds, hedge funds and Strategic Partnerships.

Quantitative Equity Group (QEG)

No. of People: 21

AUM: \$12.9B

Mission: Create value managing equities, using quantitative analysis to systematically identify and capitalize on opportunities, while maintaining a disciplined and risk-managed approach.
Provide timely, high-quality quantitative analysis to enhance investment understanding and decisions across Public Markets.

Internal Fundamental (IFM)

No. of People: 20

AUM: \$7.9B

Mission: Develop and invest across a collection of boutique strategies implemented by internal teams using predominantly fundamental research.

Special Opportunities (SO)

No. of People: 6

AUM: \$8.5B

Mission: Capture unique and niche investments for the Trust. Investments are predominantly public market co-investments and illiquid credit.

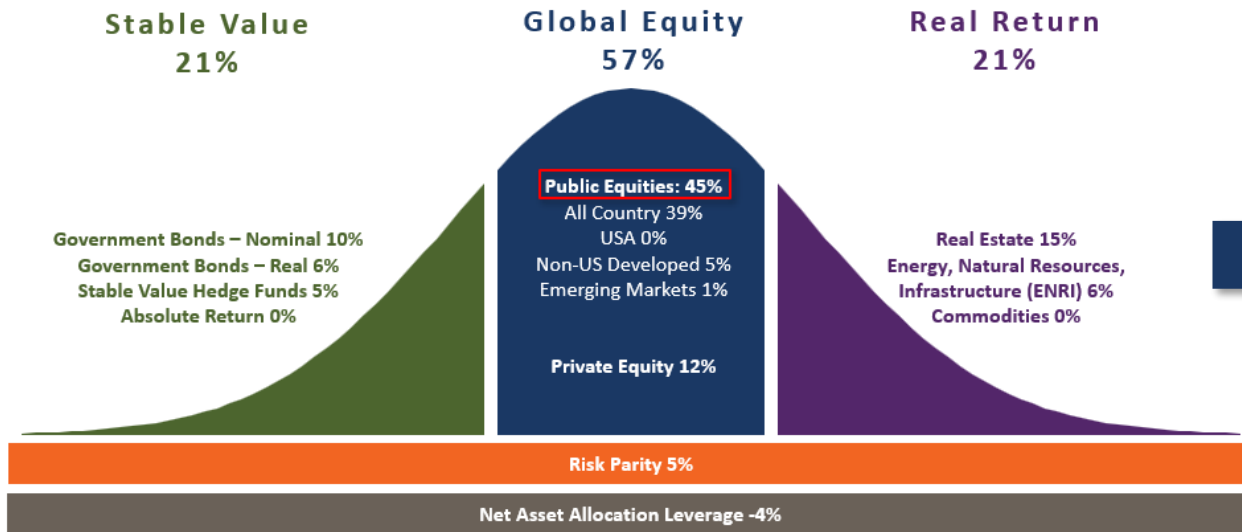

Rotational Analyst Program (RAP)

No. of People: 5

Mission: Attract and train high-potential early career investors who rotate among Public Markets groups during a 3-year program.

Global Equity Overview

Global Equity's role in the Trust:

Global Equity Breakdown

Public Equity Portfolio		
As of 12/31/2025	Assets (in billions)	Assets % of Trust
External Manager/ Public SPN	\$59.4	25%
Multi-Asset Strategies	12.9	5%
Internal Fundamental	7.9	3%
Passive & Transition	21.4	9%
Total Public Equity	\$101.5	43%

Philosophy

Active Management

We believe active management will add value over time

Factors

Targeting factors that are compensated in the long run, such as value, is a key active strategy

Internal

We prefer to manage strategies internally when we have the resources and skills to compete with external managers

External

When we don't have internal capabilities, we can select external managers who will add value net of fees

Efficient Markets

Active management is most successful in less efficient markets, including international and small caps

Internal & External Management

Public Equity Split by Strategy Group

Source: State Street Bank.

Note: Directional Hedge Funds are no longer a separate allocation and are included in External Public Equity. Public SPN values only include Global Equity assets.

Public Equity Performance

Public Equity Portfolios excluding Strategic Partnership TAA						
As of December 31, 2025						
	Assets (\$ millions)	Assets (percent of Trust)	Return (%)	Alpha (bp)	Return (%)	Alpha (bp)
			1-Year (Annualized)		3-Year (Annualized)	
All Country	\$84,563	36.0	23.4	167		
<i>TRs All Country Benchmark</i>			21.7			
Non-US Developed	11,729	5.0	39.3	825	21.0	371
<i>TRs Non-US Developed Benchmark</i>			31.1		17.3	
Emerging Markets	2,499	1.1	31.8	31	17.2	48
<i>TRs Emerging Market Benchmark</i>			31.5		16.7	
Total Public Equity	\$98,791	42.0	25.5	237	20.7	147
<i>TRs Public Equity Policy Benchmark</i>			23.2		19.3	

- The equity portfolios earned \$21B in 2025
- The portfolios generated \$1.6B in relative dollar value added (RDVA) in 2025 and \$2.7B over the last three years
- Hedge funds, along with internal and external quantitative strategies, performed particularly well

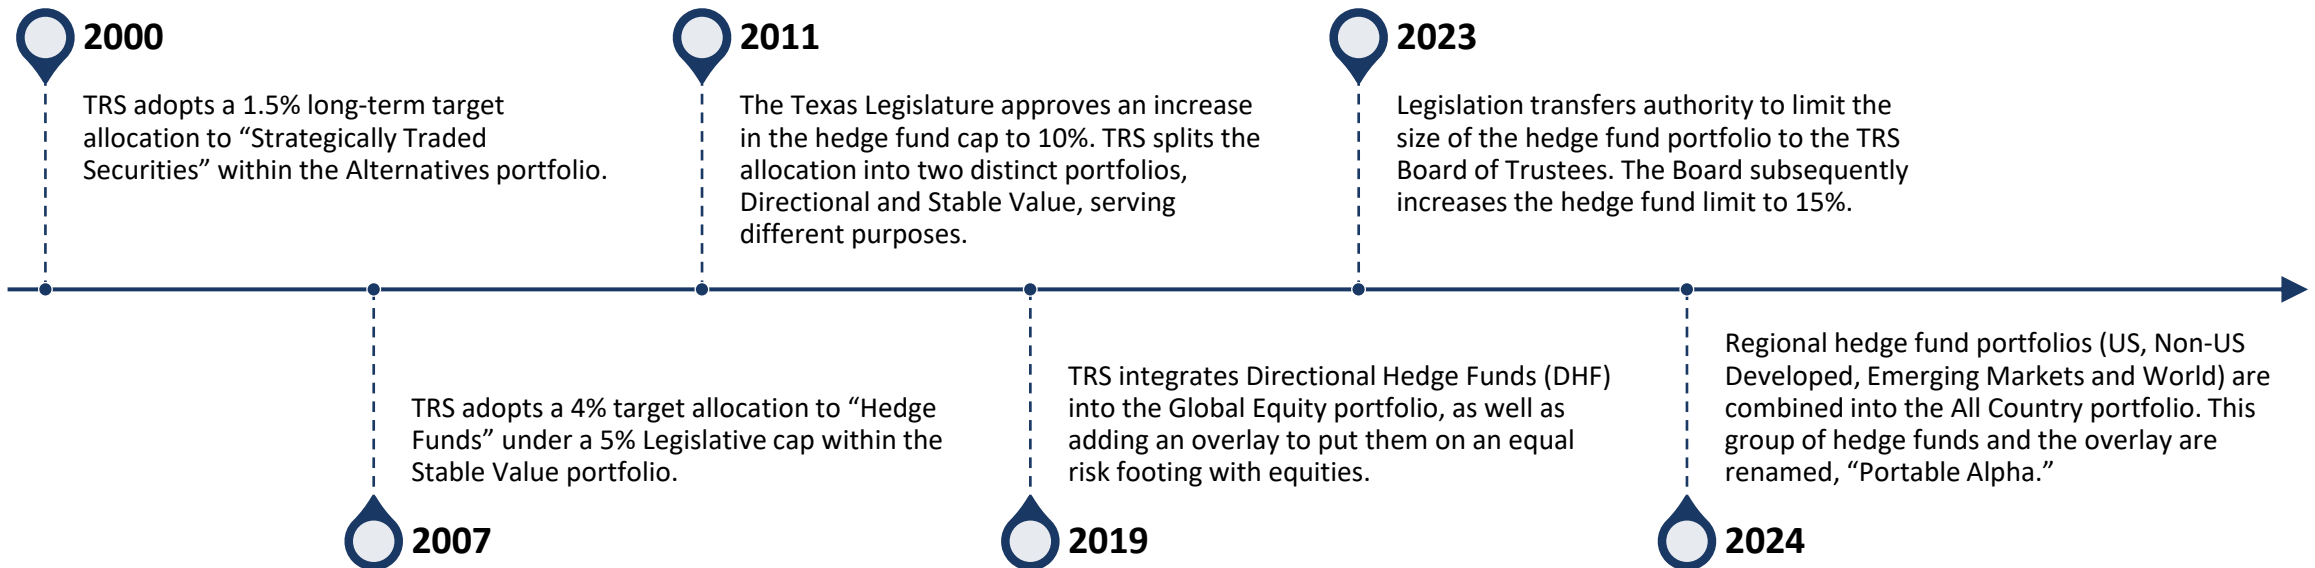

Special Topic – Hedge Funds at TRS

What is a Hedge Fund?

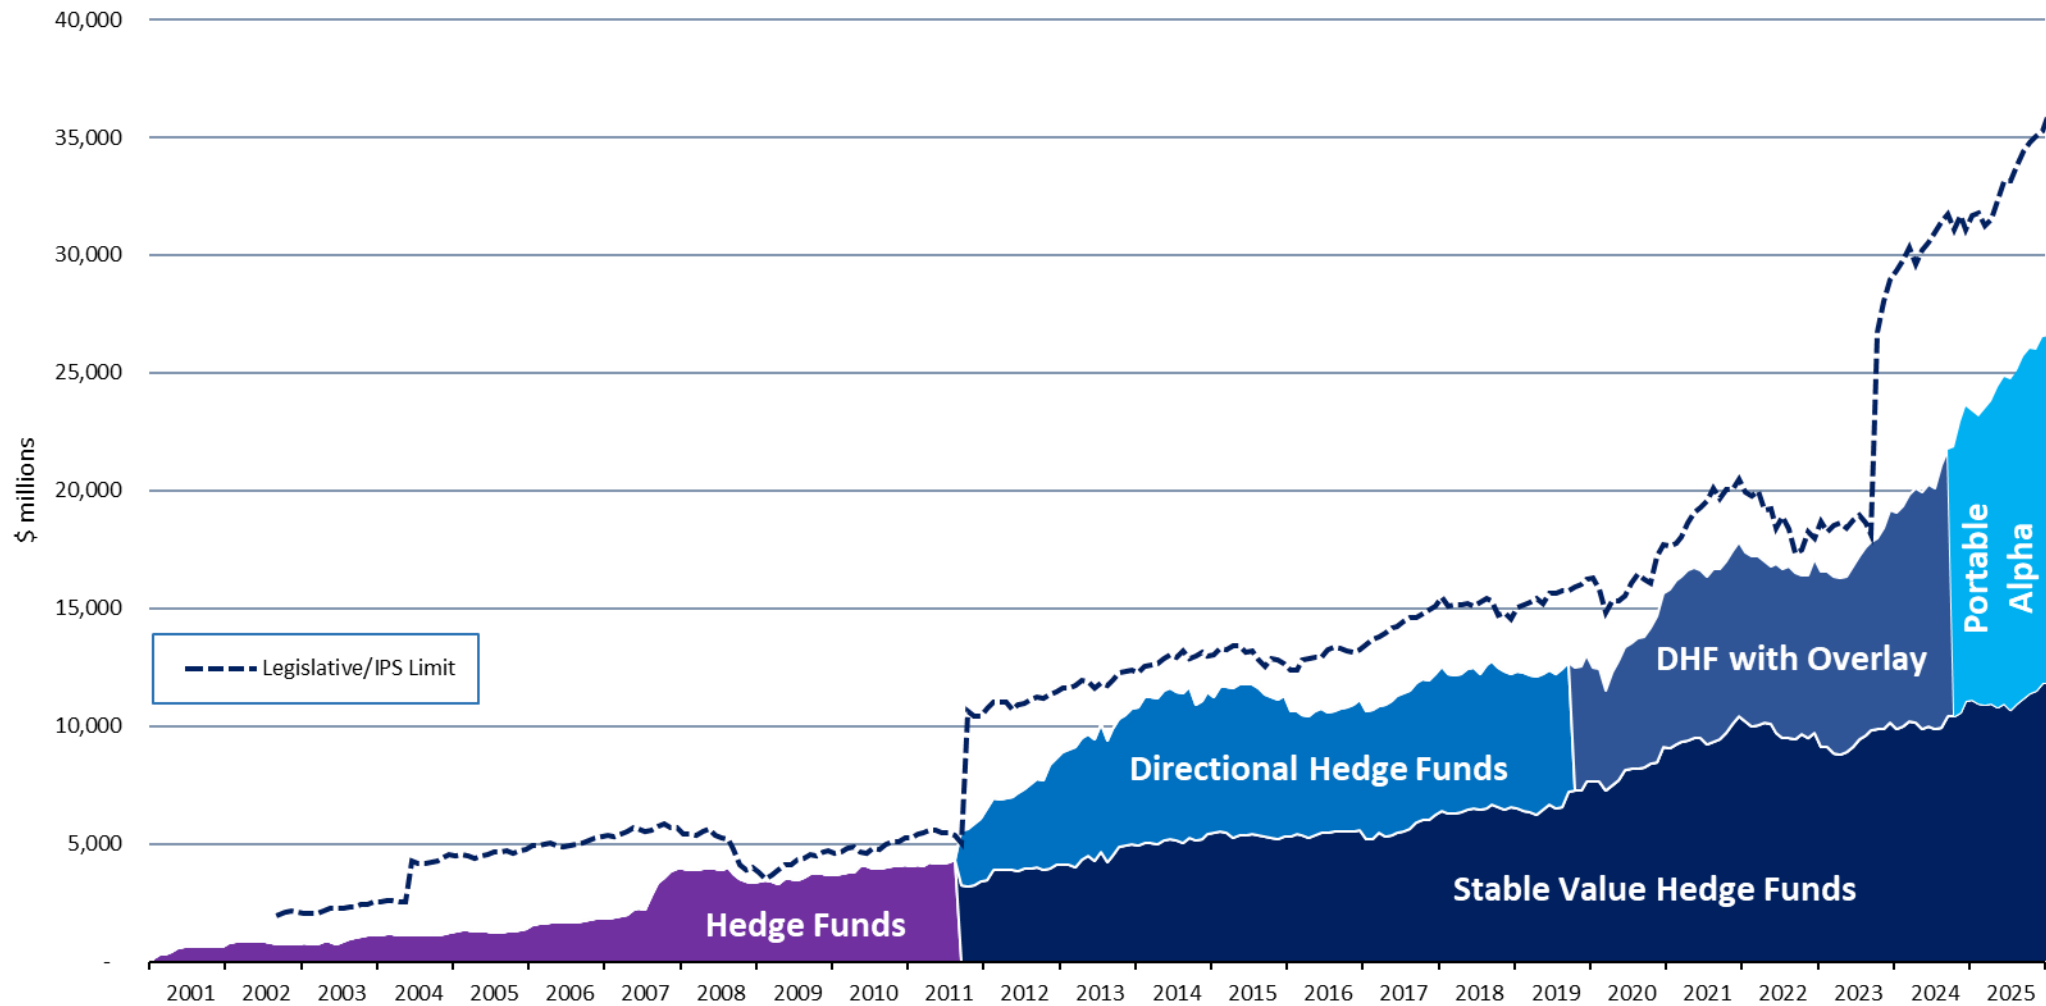

- Flexible investment vehicles
 - Trade multiple asset classes, primarily in public markets
 - Invest long and short
 - Don't typically move in lockstep with markets
- Active trading
 - Positions change frequently
 - Employ leverage and derivatives to manage and express risk
- Less transparency than long-only portfolios
 - Since the GFC, frequent risk-level transparency is standard
- Fees are performance-based, and higher than long-only
- Investor liquidity varies widely by strategy and fund
- The Trust uses hedge funds in multiple asset classes, predominantly in public markets

History of Hedge Funds at TRS

- The role of hedge funds has evolved over the 25 years that TRS has invested

External Public Hedge Fund Historical Allocation

Two Hedge Fund Portfolios, Clear and Differentiated Roles

Portable Alpha

- Since 2019, integrated into the Trust's equity portfolios, with the same benchmarks
 - A derivative overlay brings the hedge funds to market-equivalent risk levels
 - In 2024 consolidated into the All Country asset class
 - 6.4% of Trust assets as of December 2025
- A variety of market-sensitive strategies
- Portable Alpha has been successful and generated \$2.2 billion in RDVA since inception (Oct 2019)
 - These results are included in overall Public Equity performance

Stable Value Hedge Funds

- Intended to generate returns independent of market direction
 - Invest in a wide range of assets including stocks and bonds on a market-neutral basis
 - Absolute return benchmark (SOFR + 2.5%)
- The portfolio is relatively liquid; redemptions allow Trust rebalancing into assets after markets decline
- Separate asset class, results reported separately

Stable Value in the Trust

Stable Value Hedge Fund Performance

Stable Value Hedge Funds							
<i>As of December 31, 2025</i>							
	Assets	1-Year		3-Year		Since Inception October 2011	
	(in millions)	Return (%)	Alpha (bp)	Return (%)	Alpha (bp)	Return (%)	Alpha (bp)
Stable Value Hedge Funds	\$11,850	13.3	620	10.3	377	6.4	218
<i>Stable Value Hedge Funds Benchmark</i>		7.1		6.5		4.2	

- SVHF generated its highest absolute return (+13.3%) and second highest alpha year (+620bp)
 - Performance was balanced across strategies
 - Strategies benefited from volatility and dispersion across markets creating a good environment for alpha generation
- SVHF has been a consistent outperformer
 - Over 3 years, SVHF added \$1.1 billion in relative dollar value add (RDVA) versus the policy benchmark
 - Since inception, SVHF added \$2.6 billion in RDVA versus the policy benchmark

Stable Value Hedge Fund Portfolio

Stable Value Hedge Fund Objectives	Status	Details
Hedge Fund Types Focus on absolute return hedge funds		<ul style="list-style-type: none"> Return: 6.4%¹ Sharpe Ratio: 1.6
Market Sensitivity and Risk Core strategies have low to negative market sensitivity		<ul style="list-style-type: none"> Correlation to Global Equities²: 0.2 Beta to Global Equities: 0.05
Market Regime Performance Expected to have positive returns when markets are down		<ul style="list-style-type: none"> Outperformed equities in every down month for stocks, by an average of 3.7% Positive returns in 76% of 41 down equity months since October 2011
Performance versus US Treasuries Expected to outperform US Treasuries over the long term		<ul style="list-style-type: none"> 6.4% return versus Treasuries³ 0.9% 3.1% volatility versus Treasuries 12.2% 12/31/25 10-year Treasury yield-to-maturity: 4.2%
Performance versus Benchmark Stable Value HF benchmark ⁴		<ul style="list-style-type: none"> 2.2% ahead of Stable Value HF benchmark since inception Tracking error of 2.6%

Source: State Street Bank, Bloomberg

Note: Performance is annualized and is net of fees.

¹Dates: October 2011 (inception) to December 2025

²MSCI All Country World Index

³Bloomberg Barclays US Long Treasury Total Return Index

⁴HFRI Fund of Funds Conservative Index through 9/30/2024, SOFR + 250 thereafter

Hedge Funds at TRS

- Trust allocation for over 25 years
 - Diversifying
- Consistent return and alpha generator
 - Fees aligned with alpha
- Growing allocation subject to 15% IPS limit
 - Adding to equity strategies in Portable Alpha
 - Implementing a tactical overweight to Stable Value Hedge Funds

Public Markets 2026 Priorities

- Managing risks and taking advantage of opportunities arising from greater market and macroeconomic volatility
 - AI winners and losers
 - International opportunity set
- Increasing the allocation to internal quantitative strategies as the team has rebuilt
- Improving equity portfolio risk management through use of an optimized completion portfolio
- Maintaining a culture that is collaborative and accountable

APPENDIX

Strategic Partnership Tactical Asset Allocation

Strategic Partnership Tactical Asset Allocation							
<i>As of December 31, 2025</i>							
	Assets	1-Year		3-Year		Since Inception	
	(in millions)	Return	Alpha	Return	Alpha	Return	Alpha
		(%)	(bp)	(%)	(bp)	(%)	(bp)
Public SPN	\$3,389	16.8	-120	13.5	-90	7.2	76
<i>Public SPN Benchmark</i>		<i>18.0</i>		<i>14.4</i>		<i>6.4</i>	

- The Strategic Partnership Network is transforming, with a single partner in the historical low-breadth tactical asset allocation strategy
- The program goal is to work with our largest partners, whether labeled “Strategic” or not to generate:
 - Investment Alpha – Capital efficient delivery of the best that firm has to offer
 - Service Alpha – Research, conferences and special projects for TRS
 - Innovation Alpha – New and reengineered strategies that benefit TRS economically and reputationally

Annual Review of Absolute Return

Ashley Baum, Managing Director

April 2026

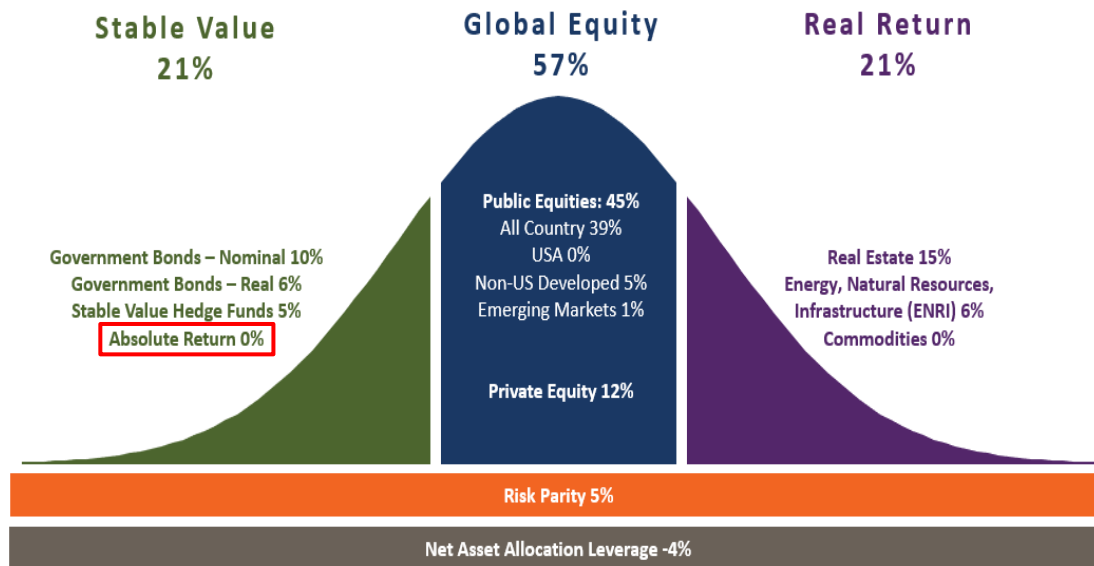

Role in the Trust

Absolute Return (AR)

Absolute Return (“AR”) is “a broad category that includes all assets that have a high probability of generating a positive absolute return regardless of market conditions over a one- to three-year period”

- Policy range of 0-20% with a target of 0%
- Actual size depends on the opportunities available

AR TARGET % OF TRUST

HISTORICAL TRUST ALLOCATION

Absolute Return Portfolio Summary

- Absolute Return represents 3.5% of the Trust, composed mostly of investments made by the Special Opportunities team.

MARKET VALUE BY STRATEGY

AR Market Value \$8.3B as of 12/31/25

Special Opportunities Portfolio Goals

- Deliver an 8% IRR over a 3-year basis
- Scale portfolio up/down opportunistically
- Capture unique and niche investments
- Act as innovation agent for the IMD

- Special Opportunities Portfolio launched in 2013 and includes fund and principal investments
- Since inception, TRS has deployed over \$21.1B in these opportunities, resulting in a 16.1% time-weighted return and a 11.4% IRR since inception
- SO manages the portfolio to a maximum weight of 5% during normal environments, although it will often be well below that level

Special Opportunities Portfolio Absolute Return

As of 12/31 each year

- The Special Opportunities team has historically targeted an 8% return over a 1- and 3-year basis
- Absolute Return has exceeded this target return on a 1-year basis 8 out of 10 periods and on a 3-year basis 7 out of 10 periods

Last 10 Years of Special Opportunities 1-Year and 3-Year Returns¹

Source: State Street

¹ Returns include Tactical Value from its inception in 2015. Special Opportunities began managing Tactical Value in March 2020

Special Opportunities Performance Summary

Opportunistic Deployment

Net Cash Outflows and Inflows by Year

- SO does not deploy capital unless the opportunity set is compelling
- This opportunistic and variable deployment is unique in the Trust
- SO investments have a faster cash flow cycle than private markets generally
- SO total invested amount (\$21.1B) is much larger than market value (\$8.5B) as of year end 2025
- SO saw a net cash outflow (contribution) of \$65M for the 2025 calendar year

Historical Annual Cash Outflows and Inflows (\$ Millions)¹

Source: State Street, TRS IMD

¹ Cash flows presented include Tactical Value from its inception in 2015. Special Opportunities began managing Tactical Value in March 2020. The chart shows cash flows netted at the transaction level to remove the impact of capital recycling. ² Cumulative net outflows shown in chart equal \$18.6B; however total capital invested is \$21.1B as of 12/31/25 as it includes capital recycling

3. Tracking Error (TE): Public TE range bound	132 bp Realized	✓	8
4. Liquidity: Remained strong	6.9x Coverage Ratio	✓	9
5. Leverage: Trust gross leverage increased slightly	30.2% Gross	✓	10 - 11
6. Derivatives: Net notional exposure decreased	11.5% Net Notional	✓	11
7. Counterparty Risk: Within policy limits	Lowest Rating: A-	✓	12
8. Securities Lending: Utilization slightly increased	12.8% Utilization	✓	13

Unless otherwise noted, data presented as of December 31, 2025

Investment exposure declined below 104%

Asset Class Weights Trend

Asset Class Relative Weights

Source: State Street Bank; note: Net AA leverage is -3.2%, which indicates the Trust is levered by 3.2%. Relative positions shown in comparison to quarter-end Trust benchmark weights as defined in policy.

Private Equity distributions contributed to Global Equity underweight

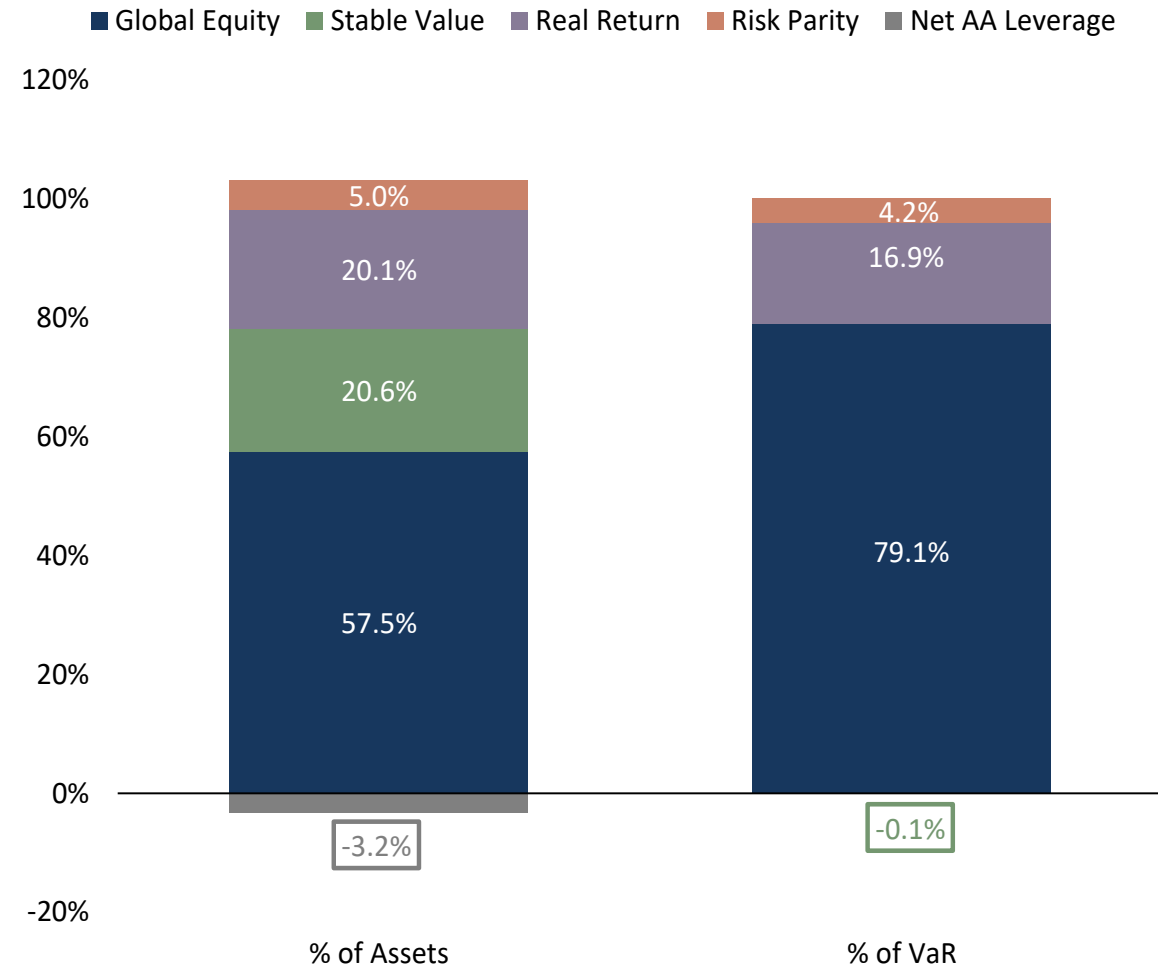

Value at Risk (VaR) estimate declined given low market volatility

VaR History

VaR Contribution

Source: State Street Bank through Q2 2025 and MSCI RiskMetrics starting Q3 2025. VaR calculating using an expanding window from 1/1/2008. VaR contribution from derivatives was 0.4%

Predicted Trust returns in line with expectations across different scenarios

*Stress tests represent 10-day return period. Source: MSCI RiskMetrics; note: data shown are predicted drawdowns given current allocation, except for Q1 2020 and Q2 2022, which reflect realized performance.

Scenario analysis provides insight into Trust biases

Three steps to performing scenario analysis

1. Start with Trust holdings as of 12/31/25

\$235b
(90k+ line items)

2. Map current assets to public proxies where needed

e.g. Rivian -> MSCI Auto Manufacturers

3. Apply proxied portfolio to historical event

Emerging Market Rally

(March 4 – 18, 1999)

US equities... +5.7%

EM equities... +10.0%

Treasuries... +2.5%

Other...

Scenario analysis helps us:

1. Reveal biases within Trust holdings

- Trust has more assets that do well in an Emerging Market rally than the benchmark

2. Validate tracking error estimates

- Gain of 0.3% in an Emerging Market rally is consistent with a monthly one standard deviation event

3. Think through liquidity scenarios

- Which assets might be sources of liquidity at different times

Realized tracking error near historical norms

Asset Class Tracking Error

Historical Trust TE

Source: State Street Bank and MSCI RiskMetrics; note: current forecast tracking error uses past experiences from January 1, 2008 to December 31, 2025 and therefore includes the effects of the Global Financial Crisis; Non-US Developed had tracking error of 186 bp realized, 133 bp forecasted with a policy neutral of 300. Emerging Markets had tracking error of 195 bp realized, 270 bp forecasted with a policy neutral of 300. All Country had 125 bp forecasted with a policy neutral of 300. USA has a policy neutral TE target of 300bp but is not reported above due to its immaterial NAV balance. Govt Bonds - Real and All Country realized tracking error will be reported once 36 months of history is accumulated.

Trust held excess liquidity at year-end

Liquidity Sources and Uses

Sources (\$49.2) / Uses (\$7.2) = Liquidity Ratio (6.9)

Liquidity Ratio

Source: State Street Bank, TRS IMD

Assumptions: The stress case assumes liquid assets experience 1.5x the worst rolling monthly return since 2008. Operational uses of liquidity reflects forecasted monthly benefit payments. Stressed securities lending reflects potential costs associated with early termination. Stressed non-collateralized assets and derivatives reflect margin calls based on the same market stress applied to Liquid Assets. Stressed Private Market investment estimates are informed by historical capital calls and distributions. Pre-Stress Liquidity Sources = Total Trust NAV minus private assets, illiquid public equity external managers/hedge funds, and bonds pledged as collateral.

Hedge Fund gross leverage increased

Risk Parity and Hedge Funds

Real Estate Loan to Value

Source: MSCI RiskMetrics, State Street Bank, TRS RE manager data, NCREIF. HF leverage is reported on a quarter lag; DHF overlay was 82.9% of a total program size of 14.9bn; Real Estate Loan-to-Values are estimates based on self-reported manager data.

Gross derivative exposure nets down to 11.5%

Total Trust Gross Leverage

Gross Derivative Notional by Instrument (% of Total Trust)

Net Derivative Notional by Instrument (% of Total Trust)

Other sources of gross leverage include the absolute value of single-name short positions and any payables/receivables.

This slide was intentionally left blank.

In conclusion...

- Trust investment exposure below target
- Private Equity distributions contributed to Global Equity underweight
- Tracking error estimates in line with scenario analysis
- Trust held excess liquidity at year-end
